---

## SUMMARY

Frontend developer building precise, user-focused web and mobile interfaces from concept through to deployment. I focus on turning product ideas into clean, responsive, and maintainable applications with smooth user experiences across devices.

---

## WORK EXPERIENCE

### Tarantula

Frontend Engineer

September 2025 - Present

- Developed a modular production management dashboard using Next.js, covering the full workflow from order intake to product delivery
- Developed a robust RBAC architecture with 400+ detailed permissions, supporting complex user hierarchies and operational needs
- Built reusable UI components with shadcn/ui and implemented data visualization using ApexCharts
- Integrated payment systems and implemented multilingual support
- Automated PDF generation for invoices and reports, improving operational efficiency and documentation workflows
- Developed a mobile application (iOS & Android) using React Native and Expo, ensuring seamless integration with backend systems
- Built real-time machine monitoring, uptime tracking, and push notifications using Firebase Cloud Messaging, focusing on performance and reliability across devices.

### Bbros

Frontend Developer

May 2024 - September 2025

- Developed a scalable marketplace platform across web, dashboard, and mobile, delivering a seamless end-to-end experience from listing creation to publication and management
- Implemented complex multi-step listing workflows with preview and validation, significantly improving usability and reducing friction in content creation
- Built high-performance search and discovery with 20+ advanced filters, optimizing data handling and user navigation across large datasets
- Developed responsive web and admin dashboard applications using Next.js, enabling real-time management of listings, statuses, and user activity
- Delivered cross-platform mobile applications (iOS & Android) using React Native, integrating real-time chat and multilingual support while maintaining feature parity with the web platform

## EDUCATION

### Computer Science and Engineering

October 2022 - January 2026

University of Business and Technology

- Degree of Web and Mobile development
- 

## SKILLS
