SUMMARY

Frontend developer building precise, user-focused web and mobile interfaces from concept through to deployment. I focus on turning product ideas into clean, responsive, and maintainable applications with smooth user experiences across devices.

WORK EXPERIENCE

Tarantula

September 2025 - **Present**

Frontend Engineer

- Developed and maintained frontend features for a cross-platform business application and dashboard system used for reporting and operational monitoring.
- Built and optimized responsive dashboard interfaces, ensuring clear data visualization and smooth user experience across workflows.
- Contributed to the development of iOS and Android applications, maintaining consistency in UI and functionality across platforms.
- Integrated APIs and external services to support real-time data handling and improve overall system performance and reliability.

Bbros

May 2024 - September 2025

Frontend Developer

- Developed and scaled multiple TypeScript-based admin dashboards using Next.js, building complex UI systems for data management, operations, and user control.
 - Built and maintained a production-ready cross-platform mobile application for iOS and Android using React Native, focusing on performance, stability, and smooth user experience.
 - Implemented core system features across web and mobile, including authentication flows, user management systems, real-time data handling, and content operations.
 - Designed reusable, scalable frontend architecture and component systems, improving development efficiency and long-term maintainability.
 - Collaborated closely with product and design teams to translate requirements into functional, high-quality features deployed in production environments.
-

EDUCATION

Computer Science and Engineering

October 2022 - January 2026

University of Business and Technology

- Degree of Web and Mobile development

Javascript & React JS

January 2024 - March 2024

ROI Academy

- Advanced Javascript and React Js Developer
-

SKILLS

Tech: React.js Next.js TypeScript Tailwind React Native

Tools: Git Expo Xcode Firebase Pusher Socket.io
